2021
Bull Sale
February 19

Buttercreek Ranch Headquarters
Echo, Oregon
Lunch 11:00 a.m.,
Sale 1:00 p.m.

FEATURED SIRES

Tehama Tahoe B767

A remarkable curve bending sire. Tahoe calves have a short gestation length, calve easily and have explosive growth and superior marbling.

Tehama Tahoe B767

Connealy Legendary 644L

Calving ease, superior growth and high marbling are his most notable attributes. We have many moderate sized daughters now entering production.

Connealy Legendary 644L

Broken Bow

Few bulls have as much proof as this superior sire for calving ease, growth and carcass quality. His daughters are fabulous cows with moderate milk.

Broken Bow

CCR Boulder 1339A

SimAngus bull Boulder is a son of Hoover Dam out of a Triple CL Taylor daughter. He brings performance and maternal traits to his daughters.

His calves are born easily and very attractive..

BW	WW	YW	MK	CW	MRB	RE	API	TI

Fellow Cattlemen,

Thank you for the opportunity to share with you our 2021 bull offering. This sale includes 6 two-year old and 80 yearling bulls of Angus, SimAngus, and Gelbvieh Angus genetics.

The bulls selected for the sale have been carefully screened for quality. Only bulls that meet our strict standards for docility, birth weight, growth performance, carcass quality and structural correctness are offered. Bull calves not meeting our criteria are banded and fed to finish at Beef Northwest.

Price Cattle Company started in the purebred Angus business in 1984 with registered Angus heifers that descended from Wye Plantation breeding. Since our early beginnings we have consistently used breed-leading proven Angus bulls as foundation sires, always stressing maternal traits.

The composite bulls in our offering were developed from our older Angus registered cows being bred to the best of Simmental and Gelbvieh bulls to produce hybrid cows. These cows have been bred back to proven bulls that are least represented in their genetic makeup to produce Composites. These Composites have the advantage of superior heritable genetics and hybrid vigor to increase fertility and longevity.

Our Herdmaker bull pairs are managed as one herd. Cows are wintered, calved, and bred at our Echo ranch. In the spring they are turned out in mountain pastures in Union County. In late August the calves are weaned, returned to Echo for 50 days, and then shipped to Top Cut Feedlot for feed testing and development.

All the bulls have been DNA tested for genetic defects and evaluated for performance traits. Further, they have been ultrasound-measured for carcass traits and evaluated for breeding soundness by Brent Barton, DVM of Oregon Trail Veterinary Clinic.

Each bull is individually valued at a very affordable price. On sale day, bulls may be purchased at the assigned price. If there are multiple buyers interested in a particular bull, that bull will be "bid off" with NO HYPE, or pressure to compete with hidden bids.

Come see for yourself. The bulls are very attractive, and easy to see in our sale pens. Your satisfaction is our goal; we appreciate your consideration.
